GUADALUPE HEALTH: ENHANCING PATIENT CARE WITH REMOTE PATIENT MONITORING

WHY CHOOSE GUADALUPE HEALTH'S REMOTE PATIENT MONITORING (RPM) SOLUTION?

At Guadalupe Health, we understand the unique challenges faced by medical clinics, especially when serving vulnerable populations such as Hispanics and rural patients. Our turn-key RPM solution is designed to seamlessly integrate into your clinical workflow, providing comprehensive support from patient onboarding to daily monitoring and monthly reporting. Here's how our solution can benefit your clinic and your patients:

KEY BENEFITS FOR YOUR CLINIC

1

Seamless Integration : Our RPM solution integrates effortlessly into your existing clinical workflow, ensuring no disruption to your daily operations.

2

Increased Revenue : With an average reimbursement of \$149 per patient per month, your clinic can see significant revenue increases by enrolling patients in our RPM program.

3

Comprehensive Reporting : We handle all aspects of the monthly reporting required to meet Medicare requirements, saving your staff valuable time and ensuring compliance.

4

FDA-Cleared Devices : Our solution utilizes FDA-cleared devices for accurate biometric capture, providing reliable data for patient monitoring.

UNMATCHED SUPPORT FOR VULNERABLE POPULATIONS

Multilingual Healthcare Providers : Our team includes multilingual healthcare providers who manage all aspects of the patient experience, from onboarding to daily monitoring, ensuring effective communication and understanding.

Dedicated Patient Engagement : We proactively intervene to increase patient adherence and compliance with their care plan, improving health outcomes.

Continuous Communication : Each patient receives a cell phone to maintain continuous communication capabilities, ensuring they are always connected to our healthcare team.

TAILORED FOR YOUR PATIENTS

Focus on Hispanics and Rural Patients

Our RPM solution is specifically designed to address the needs of vulnerable populations, including Hispanics and rural patients, who often face barriers to accessing quality healthcare.

Enhanced Patient Experience

From the comfort of their homes, patients can easily engage with our RPM program, receiving the care and attention they need without the need for frequent clinic visits.

HOW IT WORKS

- **Patient Onboarding :** Our team handles the entire onboarding process, ensuring patients are comfortable and understand how to use the RPM devices.
- **Daily Monitoring :** We monitor patients' biometrics daily, alerting your clinic to any critical changes in their health status.
- **Monthly Reporting :** Detailed monthly reports are provided to meet Medicare requirements, keeping you informed of your patients' progress and any necessary interventions.

CLIENT SUCCESS STORIES

Federally Qualified Center

Location : Puerto Rico, Florida

Onboarded and managed rural dual eligible patients in a hypertension and diabetes program that achieved 100% baseline health outcome improvement. Achieved reduction of emergency room visits for patients by continuous in-home monitoring.

Private Nephrology Clinic

Location : Central Texas

Renal patient population improved compliance with medications and diet, leading to achievement of improved blood pressure and chronic conditions management across patient population.

National Specialty HMO

Location : Florida, California

Managed community based multiple comorbidity complex patients allowing our staff to identify poli-medication issues with various patients and report to patient's primary care provider to address medication issues.
